

# **LLC Concern "Inmash" Machine-tool production**

**OUR GOAL IS TO IMPROVE THE REPUTATION AND WELFARE OF RUSSIA BY  
DEVELOPING HIGH TECHNOLOGIES IN MECHANICAL ENGINEERING, TO MAKE A GREAT  
CONTRIBUTION TO THE WORLD ECONOMY!!!**

## Brief information about the company

LLC Concern "Inmash" is a dynamically developing enterprise of the Republic of Bashkortostan in the field of metalworking and mechanical engineering, revived at the production base of the former Plant of High-Precision Machine Tools (VTS) in Sterlitamak since 1983. LLC Concern "Inmash" has a certificate of production in the territory of the Russian Federation, localized Russian production, which supports the initiative of the government of the Russian Federation to improve import substitution.

The quality management system covers the development, production and repair of products in accordance with the EKPS classes 1680, 2520, 2410, 2510, 2530, 3460, 3710, 3720, 3825, 3830, 4320, 5420 and meets the requirements of GOST RV 0015-002-2012 and GOST R ISO 9001-2015.

### Products:

- ball screw gears (SHVP);
- sliding screw nut (VGS);
- mobile drilling rig UBP - 30;
- knife planetary drive mechanism (MPPN);
- steering mechanism (MRU);
- steel tanks and reservoirs,
- horizontal and vertical
- equipment for oil companies (racks, work platforms, drilling bases, etc.)
- mast structure

### Services:

- modernization, overhaul and current repair of machine tools (machine tool repair production);
- services for the production of metal structures of various
- difficulties (welding and assembly production);
- mechanical, heat treatment and gas-plasma cutting services;
- services for the automation and digitalization of production ("Inmash - Pro" suite).

LLC Concern "Inmash", which has a rich history in the production of machine tools since 1983, offers services for the repair and modernization of metalworking equipment of various manufacturers and brands.

The accumulated experience and technical capabilities of the enterprise make it possible to carry out all types of overhaul and modernization with the restoration of accuracy to the passport values, including the geometric accuracy of the bed.

## Technological capabilities:

- ✓ grinding of bed guides;
- ✓ production of wedges for support groups of turning and milling machines
- ✓ repair of individual components and assemblies;
- ✓ repair or replacement of the lubrication system;
- ✓ repair of hydraulics with replacement of rubber goods, high pressure hoses, hydraulic valves, pressure switches, pipelines, regulators, filters, pumps, etc .;
- ✓ complex replacement of electrical equipment;
- ✓ adjustment of all units and systems of the machine in the complex;
- ✓ finishing painting of the machine

## Forms of cooperation:

- ✓ repair of machines in the for the exchange pool;
- ✓ delivery of used machines after major overhaul;
- ✓ installation and commissioning works on the territory of the Customer;
- ✓ work warranty 12 months.

Prompt and qualified repair by our forces will allow industrial enterprises to avoid long downtime. This, in turn, makes it possible to reduce the loss of manufactured products, which inevitably arises in the event of a machine breakdown.
